Education

BSc Biotechnology Hons Imperial College London	Oct 2022 — Jun 2025
- Upper Second Class Honours (68.88%) - Delivered two 1st Class research dissertations, requiring independent experiment design, parallel workflow management, and rapid iteration under fixed deadlines - Relevant Modules: Corporate Finance, Entrepreneurship (1st place in startup pitch to angel investors and Imperial Enterprise Lab), Statistics, Mathematical Modelling, Bioinformatics	
Cambridge A-Levels Methodist College Kuala Lumpur	Jan 2020 — May 2021
4A*s in Maths, Biology, Chemistry & Physics - Awards: Merit Scholarship recipient and Dean's List (Top 1% of 300+ student cohort)	

Work Experience

Equity Analyst Intern (Healthcare & Construction), RHB Asset Management Kuala Lumpur	Jul — Aug 2024
- Authored and distributed daily time-critical investment memos within a 4-hour turnaround, delivering actionable insights that enabled the team to navigate a fast-paced healthcare market with 100% accuracy - Conducted deep-dive secondary research into the national healthcare landscape to assess sector consolidation risks, evaluating medical tourism demand to support a sector "Overweight" recommendation - Distilled insights from 4 major industry conferences (Bloomberg, Citibank, etc.) into an RM126B construction super-cycle thesis presented to portfolio managers and equity desk	
Patent Analyst Intern, KASS International Kuala Lumpur	Aug — Sep 2023
- Conducted competitive landscape and prior art analysis across 6+ biotech patent filings, converting findings into risk reports for attorneys to develop prosecution strategy - Built a tracker consolidating examiner feedback, status, and deadlines, to manage parallel due diligence workstreams	

Leadership

Product & Commercial Strategy Lead, CO2LLECT (Pre-seed Startup) London	Oct 2024 — Jun 2025
- Ran 50+ outreach interviews with enterprise and independent farming clients to validate demand and identify adoption barriers, eliminating two non-viable product directions before capital deployment - Built a pricing structure by benchmarking competitor cost models, landing on a configuration that projected 40% gross margin while maintaining competitive positioning - Produced and presented investor-ready materials linking customer validation data, retention assumptions, and capital requirements, securing engagement from 5+ prospective investors - Designed a trust-led trial model offering one crop-cycle pilots to reduce adoption friction, generate ROI evidence, and improve projected LTV while minimising churn risk	
Healthcare Sector Analyst & Editorial Lead, Imperial Investment Society London	Oct 2024 — Jun 2025
- Led a 10-analyst team to deliver 30+ publications with 100% on-time completion under weekly deadlines - Synthesised complex clinical, regulatory, and commercial information into investment articles, translating technical market realities for a broad audience of 1,500+ readers	
Marketing & Growth Strategy Lead, GenCorporate London	Oct 2023 — Oct 2024
- Drove 45% member growth by analysing engagement data to reallocate effort toward high-converting segments - Negotiated partnerships with Tier-1 firms and delivered career events with 150+ attendees, owning end-to-end planning	

AI Workflow Projects

- Healthcare Market Intelligence Dashboard: Built an evaluation framework consolidating market size, CAGR, competitive activity, and clinical milestones across 6 sectors, with persona-specific views for faster, data-based diligence decisions - Lab Protocol Workflow Parser: Developed a lab protocol parser that extracts time-sensitive experimental steps and auto-generates concurrent labelled timers, reducing tracing errors across parallel laboratory workflows - Interview Research Synthesis Tool: Built a tool that converts raw interview transcripts into ranked, tagged product insights, cutting multi-hour manual consolidation to minutes
